Any wound, whether incision or laceration, has the potential to become infected if it is not treated and properly taken care of. Most of the time, this wound heals without difficulty. But in certain situations infection with bacteria can lead to ... Read more No one feels that in pain there is quite an underestimation. Anyone who has some kind of surgery, stitches, cut, or skin graft understands oh too well the pain that can be associated with any type of wound. For anyone experiencing ... Read more Bandages are used to secure the wound and prevent further infection. They're supposed to stay in direct contact with the wound. Bandages for wound care are different than a bandage, because the bandage holds the bandage in place. ... Read more Petrolatum gauze is a light cotton bandage, which is for dressing different types of wounds. They are made of fine, soft, gauze with white vaseline or a semi-solid mixture of hydrocarbons obtained from petroleum jelly. Removing these bandages from wounds can cause minimal trauma to the wound. Petrolatum gauze is widely used in skin treatment. A skin graft is one type of wound in which a piece of healthy skin replaces diseased tissue. It is mostly used on badly injured areas, severe burns and chronic infections. Petrolatum gauze is used to cover the skin graft to keep it moist and raise the attachment. This bandage will protect the open area from bacteria. It will not stick to the healthy tissue surrounding the wound. The skin graft attaches to the cells surrounding the wound to promote faster healing. Dimensions: 6 H x 6 W x 1/16 D (4 x 4 bandage, packaged) Dimensions: 4 W x 9 H x 1/16 D (5 x 9 Dressing, packaged) Weight: 0.3 oz (4 x 4 Dressing) Weight: 0.4 oz (5 x 9 Dressing) 5 Posted by Michael Dubnezic on 05 13 2020 Great product 5 Posted by Unknown on 04 06 2018 One of the best occlusive dressings I &#amp;#amp;#039 met him. Great for pocket ifak. 5 Posted by Richard K. on 02 06 2018 I have it as a universal item for pocket carry IFAK. Very thin and light. Can be folded to make an even smaller footprint. Ideal for cheap, improvised chest seals. 5 Posted by James on 10 27 2016 A very affordable and effective option for chest seals. Would recommend them for their extremely compact (practically paper thin) design. Suitable almost anywhere for people with space constraints. I used it as a cheaper alternative to launch my first IFAK. It was something I could afford, knew it would be and I could carry it with me anywhere while on patrol. 5 Posted by Carlos huerta on 01 19 2016 Love this guaze is the most affordable way to make chest seals. © 1996-2015, Amazon.com, Inc. or its branch Printer-friendly version of Vaseline® Petrolatum Gauze is a sterile, occlusive dressing consisting of fine-mesh, absorbent gauze impregnated with approximately three times its weight of white petrolatum. Oil gauze bandage Dynarex is a non-wasted, non-stick gauze pad that is impregnated with petroleum jelly to create an occlusive healing environment for wounds and lacerations. This Vaseline dressing will not hold wounds and facilitates dressing changes with less wound trauma while providing wet-wound healing. Petroleum bandages are most suitable for use on non-drainage wounds, skin grafts, burns, decubitus and abrasions. Single sterile packaged, bandage measures 3x9 inches, 12 in a box. Field.
